

— THE NEXT GENERATION —

# DOUBLE X<sup>®</sup>

## Are You Searching For Balance In Life?

Our bodies need balance too. Unfortunately, the problem we all face comes from free radicals created in the body and from everyday life factors such as stress, sun exposure and pollution. Free radicals alone aren't the enemy. Our bodies need them for optimal health and metabolism. Too many free radicals, though, will cause the body to counteract them by making antioxidants. When the body can't make enough antioxidants to balance the free radicals, oxidative stress results and cellular damage occurs. Here's a simple solution: The next generation of NUTRIWAY<sup>®</sup> DOUBLE X<sup>®</sup> supports your body's natural antioxidant defence mechanisms to help fight against excess free radicals and support your overall health, delivering the balance you need.

### Uses The Latest Research

The next generation of DOUBLE X is based on evolving science around the use of plant phytonutrients to support the body's own antioxidant defence system. Certain phytonutrients work better than others. Our NUTRIWAY scientists evaluated each vitamin and mineral level and found that balanced levels are more effective than simply large quantities, as excess dosages in the body can have undesirable effects.

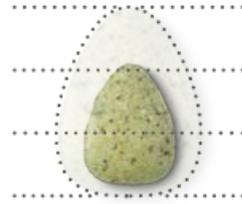

### Filling More Gaps

NUTRIWAY DOUBLE X features 22 plant concentrates from all five colours of the phytonutrient spectrum. It also has an improved berry blend added to specifically fill the purple phytonutrient gap found in most global diets, as discovered by the Global Phytonutrient Report.<sup>1</sup> The new berry blend offers a rich source of anthocyanins, which may support vascular health, brain health and eye health.

# — THE NEXT GENERATION — DOUBLE X®

## ⬡ Patented PhytoProtect™ Blend<sup>1</sup>

Our NUTRIWAY® scientists began testing for plants that support cellular protection against free radicals in the late 2000s. They conducted more than 20,000 tests, screening more than 1,000 plant extracts before discovering Rosemary, Turmeric and Fava d'Anta (source of quercetin) extracts - PhytoProtect Blend. They found that these plant extracts had natural cell protection qualities, but when combined, a unique synergy occurred and were exponentially stronger together.

## ⬡ 1/3 Smaller Tablet Size

The next generation of DOUBLE X leverages extraction technology to deliver a higher concentration and potency of phytonutrients from extracts, resulting in more concentrated phytonutrients in one third smaller tablet size. It now also contains soothing peppermint and is gentle on the stomach with improved aroma.

### TURMERIC

- *Sustainably harvested on Nutricert™ certified organic farms in India and Cambodia.*
- *Each Turmeric plant undergoes strict qualification screening before being approved for cultivation. After harvest, the Turmeric is sun-dried to concentrate its potent phytonutrients.*

### ROSEMARY

- *Grows across the globe, but harvested from the Atlas Mountains in Morocco because of the area's extreme temperatures and minimal rainfall.*
- *The harsh conditions trigger the plant to develop protective phytonutrients. It is also organically grown and Nutricert certified.*

### FAVA D'ANTA

- *Organically grown and Nutricert certified, the Fava d'Anta in the PhytoProtect blend is wildcrafted in Brazil.*
- *Fava d'Anta provides Quercetin, a phytonutrient that supports overall vascular health.*

### Is this product GMO free?

*NUTRIWAY has always been committed to creating supplements with natural ingredients. That is why we are committed to being a non-GMO brand. Our products comply with and exceed global GMO labelling requirements.*
